RE: Reply to Opposition to Petition to Deny Radio Station
KOKS, 89.5 FM, Poplar Bluff, Missouri

Dear Ms. Searcy:

Enclosed is my reply to Calvary Educational's "Opposition to
Joint Petition to Deny".

Respectfully,

Doris L. Smith

Doris L. Smith

REPLY

I wish to point out to the Commission that the "Petition to Deny" the renewal of the license of Radio Station KOKS, Poplar Bluff, Missouri, is an individual petition, signed by myself, alone, and is not a "Joint Petition".

1. The FCC should have enough facts by now to conclude their investigation and make a decision.

2. My property and my house are in very close proximity to the KOKS tower. The United States has no official mandatory standard for the protection of the public from potentially hazardous exposure to RF radiation. No one knows for sure what hazards may exist with regard to long-term exposure, as discussed in the FCC's own bulletins.

3. Please note that my television interference problems are with all four channels, three of which are so-called guaranteed channels. I have received all 4 of these channels as long as I have lived here until KOKS came on the air. More than one-thousand complaints have been filed with the FCC from people living all over Butler County, with the majority of these complainants experiencing interference from KOKS on more than one channel. We have no way of knowing whether KOKS's interference study was accurate.

4. & 5. KOKS has knowingly and willfully misrepresented facts concerning my case and other people's cases in their reports from December 1988 to December 1989. Further, the station willfully misrepresented facts to their own listening public when they reported in their January 1990 Newsletter that the filters they put on people's TV's cleared up the interference on guaranteed channels.

6. I have already responded to KOKS's reports of October 20, 1989 and December 15, 1989, including Charlie Lampe's letter in letters to Mr. Bob Greenburg dated October 31, 1989 and January 2, 1990. Mr. Lampe has never been in my home and further, Mr. Lampe has never put a filter on my TV or radio because he told me that KOKS would not authorize him to come to my home and install filters.

7. See my letter to Bob Greenburg dated January 2, 1990.

10. The fact that KOKS is disrupting television (on guaranteed channels as well as channel 6) to more than 1000 signed complainants, is evidence enough to prove that the renewal of Calvary's license is contrary to the public interest. Furthermore, their knowing and willful misrepresentations to the Commission proves that they are unwilling to abide by the Commission's rules and regulations. We plead with you to deny their license renewal.

Respectfully,
Doris L. Smith

ATTACHMENT 8

Did KOKS send you a questionnaire by Registered Certified Mail? yes or no

2. Did you respond and send back their questionnaire? yes or no

(a) Did you approve of a home visit? yes or no

(b) If answer to above is no, please explain why. Comment: _____

3. Did KOKS personel call and make an appointment to come to your home? yes or no

(a) Did KOKS personel come at the appointed time? yes or no

(b) If answer to above is no, please explain. Comment: _____

4. Did KOKS personel bring a tape recorder into your home? yes or no

(a) If answer is yes, did KOKS personel ask for and receive your permission to use the recorder? yes or no Comment: I asked if any of them

had a recorder, to please leave it outside!

5. Are you satisfied with the filter(s) that KOKS personel provided and does it continue to work at all times? yes or no Comment: It restored only

Ch. 12, but at times, Ch. 12 has snow, zig-zag
type lines + pulsating movement.

(a) If you had any problems with the filter, did you call the station? yes or no

Comment: I called + told Mrs. Stewart that Ch. 15 had snow
+ that Ch. 8 was totally unwatchable, + at times
Ch. 8 has their music blairing out.

6. Did KOKS personel restore your guaranteed channels to the reception you received before KOKS started broadcasting? yes or no

(a) If answer to above question is no, please describe continued interference on these channels:

Channel 12 clear most of time, snow, lines + pulsation some times
Channel 15 snow (distortion, but that clear when antenna is turned)
Channel 8 much snow, strong flashing white lines, rolling

7. How many TV's, radios, or stereos, in your home did KOKS put filters on?

how many TV's 1 radios 0 stereos 0 satellite dish N/A

(a) How many other items (radios, TV's, stereos) do you own which are affected by KOKS signal. (NOTE: mention only items which may be plugged into an electrical outlet, not battery operated)? How many TV's 3 radios 3 stereos 3
satellite dish no.

(b) Did KOKS personel offer to put filters on any of the above mentioned items listed in part (a) yes or no Comments: I asked about them

putting filters on my other TV's, they refused. I
asked if that was station policy or FCC policy.
They told me they only had to fix one TV + that
it was FCC policy. see next page 27
continue

This page of the questionnaire is included for you to write any additional comments.

Please sign and date below, thank you.

The filter restored only 1 channel, Ch. 12. But sometimes, even Ch. 12 still has their interference. Besides their normal interference, I still have their audio, at times, coming through the speaker on my TV, even with the antenna totally unhooked. (The field team that came a year ago last Dec. can verify this.) Sometimes this is only heard as a buzzing and sometimes the audio is so loud you can sit 8-10 feet from the TV and sing along. Also, I still have their electrical interference, white flashing wide lines. This happens mostly when it is wet, rainy, foggy; any moisture in the air.

See my comments about the visit to my home on additional pages. - The piece of paper that was brought to my home when the filter was put on was notarized before they came in the house. They did not ask me to sign it.

KOKS MADE A VISIT TO DORIS SMITH'S HOME ON 2-18-1991 AT 1:00 PM. CHANNEL 8 AND CHANNEL 6 WAS NOT COMING IN, CHANNEL 15 AND CHANNEL 12 COMING IN. MR. LAMPE LOOKED AT THE ANTENNA AND SAID THAT THERE WAS PROBLEMS, THE ANTENNA ELEMENTS WERE NOT POSITIONED RIGHT AND ON CHECKING FUTHER HE FOUND THAT THE LEAD WIRE WAS NOT CONNECTED TO THE ANTENNA AT THE RIGHT PLACE ALSO THE LEAD WIRE HAD BEEN SPLICED AND TAPED WITH WHITE TAPE ALL OF THIS WAS AFFECTING HER RECEPTION. KOKS PUT ON NEW COAX CABLE FROM ANTENNA TO TV. WHILE MR LAMPE WAS TRYING TO WORK TO SOLVE THE INTERFERENCE PROBLEM, MRS SMITH KEEP BADGERING HIM FINALLY MR. LAMPE ASKED MRS. SMITH TO PLEASE STOP BADGERING HIM HE WAS THERE TO TRY AND HELP HER, THIS HELPED FOR A TIME. ON KOKS LEAVING MRS. SMITH HOME CHANNEL 12 WAS VERY GOOD, CHANNEL 15 HAD SOME SNOW, CHANNEL 8 WAS SNOW AND ROLLING CHANNEL 6 WAS COMING IN WITH SNOW.

ON 2-19-1991 AT 9:15AM MRS. SMITH CALLED THE RADIO STATION AND SAID CHANNEL 15 STILL HAD SOME SNOW, CHANNEL 12 WAS VERY GOOD, CHANNEL 8 HAD KOKS AUDIO AND SNOW, SHE DID NOT MENTION CHANNEL 6 SO I ASKED ABOUT CHANNEL 6 SHE SAID COMING IN WITH SNOW.

LATER IN THE AFTERNOON OF 2-19-1991, I SPOKE WITH MR. LAMPE ABOUT MRS. SMITH PROBLEM WITH CHANNEL 8, AND MR. LAMPE SAID ALL THAT WAS NEEDED WAS CHANNEL 8 TO BE TUNED IN PROPERLY, MR. LAMPE DID NOT TUNE THE TV BECAUSE HE FELT MRS. SMITH WOULD ACCUSE HIM OF MESSING UP HER TV.

I CALLED MRS. SMITH ON 2-20-1991 AT 9:25AM. AND TOLD HER THAT MR. LAMPE SAID THAT CHANNEL 8 NEEDED TO BE TUNED AND SHE SAID THAT IT COULD NOT BE TUNED ANY BETTER AND THAT THE AUDIO COMING IN ON CHANNEL 8 PROVED THE FILTERS DID NOT WORK, I TRIED TO EXPLAIN THAT IF CHANNEL 8 WAS TUNED SHE WOULD SEE A BIG DIFFERENCE IN RECEPTION BUT SHE SAID IT COULD NOT BE TUNED ANY BETTER.

SINCERELY

Comments Concerning the KOKS
Visit to My Home

586

Attached to this letter you'll find a copy of what we received from KOKS (2 pages) concerning the visit they made to my home. Please check to be sure that these 2 pages are identical to what KOKS sent to the FCC.

In the first part of the report they say my antenna wire was spliced and improperly hooked up. We had put up new wire (flat) last summer and it was not spliced, only taped where it went over the edge of the roof to protect it from rubbing. As to it's being improperly hooked up, I don't know. My husband + son put it up. When you live under constant interference, it's hard to know if something isn't adjusted right, because the TV never clears up no matter what you do! Also, KOKS accuses me of badgering Mr. Charlie Lampe. That is not true! I did not raise my voice at any time or act in a threatening manner, do or say anything that could be construed as badgering. I only asked a few important questions. I asked, ① what power KOKS was running,

at, ② whether the filter would take KOKS audio out of the TV's speaker even when the antenna was detached, (The field team that came here in Dec. '89 can verify I have their audio even when the antenna is detached;) ③ whether the filter would take out KOKS' electrical interference. - They could not or would not tell me the power level. ④ I asked how much the filter cost, and Mr. Lampe said \$49.95 retail. (See our information from the filter company - when purchased by 100's, the filter cost \$18.66.)

The KOKS report omits an important fact. - At one point Mr. Lampe insinuated that we would receive Ch. 8 and Ch. 15 better if we could turn the antenna. I asked him to turn it and prove to me I would get better reception and told him I'd gladly buy a rotar. Mr. Lampe went up on the roof and turned the antenna, but the reception was no better, maybe even worse. Ch. 8 in particular had very strong interference. I commented that it didn't look like buying a rotar would help

my reception. It was at this point that Mr. Lampe turned and snapped at me, "I didn't come over here to be badgered by you, Mrs. Smith!" If anything, he was rude to me! Mrs. Hillis was here and she is my witness. (see her attached letter.) The two phone calls reported at the bottom of KOKS' report are fairly accurate except Mrs. Stewart omitted one statement I made. I told her, "You saw my Ch. 8, it is totally unwatchable." Oh yes, Mr. Lampe did try to tune my TV, I even showed him which button to pull out.

I have stated on my signed questionnaire that I continue to experience electrical interference from KOKS in addition to their regular interference. I would like to clarify to you as to how I know this is KOKS' electrical interference. I have personally observed 3 fires on the KOK tower and numerous smaller "sparkings" and flare-ups. One of these fires was observed ^{by} my whole family and the Hillis family and burned for over 2 hours. It occurred at night and was quite a spectacle. The radio station never went off the air during these

fires, which occurred mostly in humid or rainy weather. All of the fires I observed occurred between the date the station first came on the air and Nov. 5, 1990. On Nov. 6, 1990, KOKS installed their new antenna. - I observed on my TV the type of interference that resulted in fires. During the fire, my channels would be totally obliterated. I have observed no fires on the new antenna. However, I continue to receive the same type of interference at times, during rainy, snowy, or foggy weather.

Through personal observations of my TV's and radios, it is my opinion that KOKS has run at lower than normal power for several months now.

When KOKS personnel left my house, they knew they had not restored my reception, yet they did not offer to do anything else. So - despite all the petty excuses in their report, the fact remains: They did not restore my reception!

In closing, I'd like to say that we've exhausted all legal avenues. We've filed a Class-Action Lawsuit. We've filed an Appeal. We've written

To our Senators and Congressmen. We've done all that we know to do. It's not our fault that we live in a 3rd Class County which has no zoning laws. The tower sits almost in my back yard. One set of guy-wires come to within 35 feet of the end of my house. I feel very strongly that living this close to a source of 100,000 watts is dangerous to my health and the health of my family. We are tired of the continued aggravation and frustration at never being able to enjoy our TV's, radios, and stereos. It is up to you to do something about this situation. We have waited 2½ years for you to act. We have no one else to turn to but you, the FCC. Please do something now.

My Commission expires 4-17-92

Comment of Jean Hillis for Doris Smith 3-16-1991

Doris Smith asked me, Jean Hillis, to be at her home when KOKS arrived for their appointed visit. Mr. & Mrs. Don Stewart and Charlie Lampe arrived at approx. 1:00 p.m. Feb. 18, 1991. The filter was put on by Mr. Lampe. Mr. Lampe went back and forth putting new coaxial wire on, took old wire off, said it had been spliced and taped. It had not been spliced, "only taped" so wire would not rub against side of eve on house "not spliced." When Mr. Lampe tried all of Mrs. Smith's channels she still has snow, lines and interference, the filter made it a little better, not good enough. Mrs. Smith wanted to see if the aircal turned would make it better since she had no rotar. Mr. Lampe said Mrs. Smith needed to tune in channel 8, Mrs. Smith said she was afraid to adjust the buttons in fear she might loose all her tuned in channels, but Mr. Lampe could tune it in. I watch Mr. Lampe tune in channel 8, & go up on the roof to turn aircal. This made channel 8 worse, he could not get a good picture at all, almost all snow with white sparkle lines in it, also still had KOKS voice in background if you got close to speaker on TV. Mrs. Smith was very nice and told Mr. Lampe it would not pay to get a rotar since channel 8 would not come in. Mr. Lampe stated he was not here to be badgered by Mrs. Smith. Mrs. Smith did "not" badger Mr. Lampe, her channels 15 and 8 was not clear when he turned the aircal. I think he was upset because the channels were not clear and took it out on Mrs. Smith.

Sincerely,

Jean Hillis

MM Docket No. 92-122
Mass Media Bureau Exhibit 3

mmB
Ex.3

TESTIMONY OF JEAN HILLIS

FEDERAL COMMUNICATIONS COMMISSION

Exhibit No. MMB-3

Deckel No. 92-122

Presented by Moss Media Bureau

Identified 11/12/92

Disposition: Received 11/12/92

Rejected

Reporter B. Lord

Date 11/20/92

TESTIMONY OF JEAN HILLIS

1. I, Irma Jean Hillis, reside at Route 6, Box 1217, Poplar Bluff, Missouri, where I have lived for 23 years. My home, which is about 700 feet from KOKS' antenna, is within the blanketing contour of KOKS.

2. I own three working television sets. I also have a Magnavox stereo system and a clock-telephone-radio. All three television sets are connected to a satellite dish and two are also connected to a roof top antenna. The third has rabbit ears. All of these connections were in place before KOKS went on the air. I am able to switch between the satellite and the roof top system. The satellite dish does not provide network or local viewing. I have never had an antenna booster amplifier or a high gain antenna.

3. Before KOKS began broadcasting, I was able to view and hear television Channels 12 and 15 clearly. The reception was also very good on Channels 6 and 8, except that bad weather would cause a snowy picture. The sound was always excellent. FM reception in my home was good.

4. When KOKS began broadcasting, I lost all video and audio reception of Channel 6, and I heard KOKS' audio on that channel. Channel 12's picture became snowy, or coarse, and it had wavy

lines. There was a faint sound of KOKS. There was still a relatively clear picture on Channel 15, although the color would fade and there were wavy lines. Sometimes the signal would go off and return suddenly. The sound was almost unchanged, although there was a very faint KOKS audio signal on the channel. There was neither video nor audio on Channel 8. All of these problems would clear up totally when KOKS signed off. At first, KOKS was on the air from 6 am to 6 pm, but, for a time in 1989, it signed off at midnight. Later in 1989, KOKS began 24-hour broadcasting. With respect to FM reception, KOKS would often be heard instead of or at the same time as another station which I was trying to receive.

5. Within days of KOKS going on the air, I reported interference on my television sets to the station. I spoke to Nina Stewart, who indicated equipment was at fault and that a part was on order which would correct the problem. In the first part of November, 1988, my husband wrote to the FCC in Kansas City. In December, 1988, we also sent a petition to both the station and the FCC.

6. In March, 1989, Mrs. Stewart and Mr. Lampe came to my house. They looked at the reception on one TV set, but made no repairs.

7. At various times between December, 1988, and June, 1989,

I, either individually or with Doris Smith, sent petitions to the FCC, to congressional committees and to radio station KOKS. On December 18, 1989, I subscribed to a petition to deny, a copy of which appears as Attachment 1. I hereby reaffirm the factual allegations made therein. By documents dated January 31, 1990, I replied to KOKS' opposition to my petition to deny. A copy of that reply appears as Attachment 2. I hereby reaffirm the factual allegations made therein.

8. In February, 1991, Mrs. Stewart and Mr. Lampe came to my home for the second time. They removed the flat lead wire and put on a coaxial cable. First they ran the coaxial cable full length to see how the reception was. Then they spliced the coaxial cable with flat wire where it went through a window. There was no difference in the TV reception. They also installed a filter on one television set. Mrs. Stewart said their only obligation was to fix one TV. Nothing else; not even my stereo or radio, which I asked about during the station's visit. Mr. Lampe and Mrs. Stewart said we could buy the filters to go on our other TVs or radios, but the station would not do it. I told them they were required to do this; they said they were not. Afterwards, the set with the filter received a picture on Channel 6. The video on the other channels was still snowy, but improved, although it was not as good as before KOKS. When I told Mrs. Stewart and Mr. Lampe that the reception was not as good as before, they said it was all that they could do. There

have been no other visits to my home by KOKS personnel.

9. Within a few days of the February, 1991, visit, my television reception deteriorated. Within a week, all the channels, except Channel 6, had the same reception problems that they had before the visit. Channel 6 was somewhat improved. KOKS audio could still be heard. I telephoned the station to report that the filter did not work. I was told by Mrs. Stewart that the station had done all they were obligated to do and would do no more. I was also told that they would only repair one TV per household.

10. I received FCC visits three times. The most recent was in February, 1992.

Declaration

11. I declare under penalty of perjury that the foregoing is true and correct.

Executed on Nov. 2nd, 1992.

Jean Hillis

ATTACHMENT 1

December 18, 1989

KOKS 89.5 FM, Poplar Bluff, Missouri license renewal application ~~KOKS~~~~KOKS~~ BRED-89/1030A

1. Petition to Deny KOKS 89.5 FM, Poplar Bluff, Missouri the right to renew their license. Now KOKS is the problem. Since October 1988 to approximately September 16, 1989 when KOKS signed off the air or was off for any reason everything I had their interference on cleared up immediately, all reception was clear without interference. Since approximately September 16, 1989 KOKS is leaving their transmitter on after signing off at midnight.
2. KOKS has not solved my interference problems. KOKS continues to interfere with the guaranteed airways for more than a year now. I feel I'm being descriminated against, I'm being denied my guaranteed airway signals.
3. The FCC field office in Kansas City, Missouri received many signed petitions from me in December of 1988. Because these petitions was not sent to the Mass Media Bureau in Washington D.C. KOKS was issued their license. Because of this oversight we continue to have the interference problem for more than a year now. Karen Raines in Kansas City handled the petitions, I did not know to mail the petitions to any other office. See attachments.
4. TV interference on guaranteed channel 12-KFVS CBS Cape Girardeau, Mo. Very grainy with fine lines from upper corner to lower corner, sometimes a static line roll over.
5. TV interference on guaranteed channel 8-KAIT ABC Jonesboro Ark. No picture or very fuzzy and blurred with snow. Not watchable.
6. TV interference on guaranteed channel 15-KPOB ABC Poplar Bluff, Mo. Creamy picture, static lines and white streaks flashing thru picture most of the time and pulls the picture.
7. TV interference on channel 6-WPSD NBC Paducah, Ky. No picture at anytime only static, KOKS audio at times. Only NBC station available to this area. Before KOKS started broadcasting channel 6 was good and clear.
8. Because of this continued interference problem watching TV makes my eyes water and gives me a headache. This affects my three year old, my 15 year old, and my husband.
9. Radio interference on all radios, KOKS audio on most of the radio band upper and lower. radio stations in Poplar Bluff KOKS audio cuts in and out on KKLR-KJEZ-KAHR. KLUH we e lost completely. Other area radio stations we loose most of the time.
10. Tape players and records. KOKS audio on tapes and records at all times.
11. Telephone interference. Telephone company sent the FCC a letter on my behalf stating they could not filter out KOKS audio on my AT&T phone. KOKS audio is very loud, I have businesses and this makes phone conversation very difficult.
12. Intercom or baby monitors hum loudly with static. Have had to stop using these items.
13. Computer interference. KOKS audio is so loud the programming cannot be heard.
14. Musical instruments with speakers. Piano had KOKS audio at all times.
15. Satellite system has sparkles and distorted sound, at times two fine lines roll over.
16. KOKS' engineer Charlie Lampy and Nina Stewart from the radio station came to my home in March of 1989 to observe the interference problems. They looked at everything and left, did not offer to put a filter on or anything and have never told me what to do about the interference problems.
17. KOKS interference affects my business Camelot Estates Mobile Home Court. Most tenants have these same interference problems I do, some very a little and some do not have the items I have mentioned. Because of a constant turnover of people moving or being transferred this problem will always remain even after KOKS' annual date of financial responsibility. I do not think this is fair to my business it was established in 1972.
18. KOKS interference affects my business Camelot Estates RV Campground. Most RV'ers have the same interference as I have mentioned, some very because of different items. RV'ers also complain about cellular phones not working here. RV'ers depend on weather and news updates for traveling and want to watch their favorite sports or TV programming but are hampered by the interference problems. Many RV'ers are refusing to come back because of the interference problems, The Campground was established in 1982.
19. Because KOKS is causing so much interference to my household and established businesses, I do not feel KOKS should have the right to interfere and cause disturbances. This is causing my tenants and customers to live and stay elsewhere, in order to get away from the interference problems.
20. After all the petitions and notarized objections I have mailed you the FCC, I feel KOKS is not operating in the interest of the public. There are other similar radio and TV stations available to the public in this area that is not causing interference.

(continue next page) 7

December 18, 1989

21. Since KOKS is causing so much interference to so many different items, I can't help but think it may cause human health problems. I think resonating osillation should be looked into, or any other human health hazard. Also investigate all attachments to KOKS' tower or equipment, microwave, radar, etc. High and low frequencies from different kinds of equipment can cause eye disorders, chromosome disorders, problems with hearing aids, pace makers, metal parts, etc. I have metal parts and I'm having discomfort and some swelling the past several months.
22. I feel KOKS should cease operation and relocate. The station continues to cause interference to the guaranteed airways and other items for more than a year now. KOKS should relocate away from a residential and commercial area so the interference will not be so wide spread. This should have been reported to the FCC before KOKS could locate here.
23. I live in a third class county with no zoning laws. I implore the FCC to see this situation as your residence and established businesses, something you have worked a lifetime for.
24. I have tried filters on my own, the same ones KOKS put on other households mine did not work, and the ones from Radio Shack do not work either. TV repairmen tell me nothing will work. KOKS did not offer me any technical assistance in any way.
